One of the purposes of the project is to interconnect sites to one another, to the State and to

service providers in an effort to assist counties in providing first responder needs. This new network will alleviate the Health Department's need for competition with other county departments for bandwidth. Mr. Hartley reported that the County's cost for the project is \$319.12 per month and would be funded through the Health Department Budget. These additional funds are for a part time (20 hours per week) individual to oversee this process, with the remaining 20 hours per week being covered by a member of the Public Works and Services staff.
